

ALBOWASH

The innovative Albowash washing system guarantees fully automatic maximum cleaning of mixers without constant human participation which with traditional washing systems is indispensable. The system uses the mix water, it enters the mixer under pressure, and is distributed by means of optimizing the homogenization of the concrete. Performs continuous machine cleaning extremely efficiently, this prevents cementitious mortar from hardening. It can be applied to any mixer.

Advantages guaranteed by the system:

- Reduced maintenance
- Greatly reduced water consumption
- Twice as effective as traditional systems.
